

SHOWN: SPARK IR-10 · SPLIT AC FOR ILLUSTRATION

WI-FI OR ZIGBEE

● SPARK IR-10 · SMART IR REMOTE

Your split AC. Now smart.

The Spark IR-10 speaks your air conditioner's infrared language. Control the split AC you already have from the Tuya Smart app, by voice, on a timer, or with automations. No new AC, no wiring.

● Wi-Fi or Zigbee

● Split AC control

● IR library above 98%

● IR learning

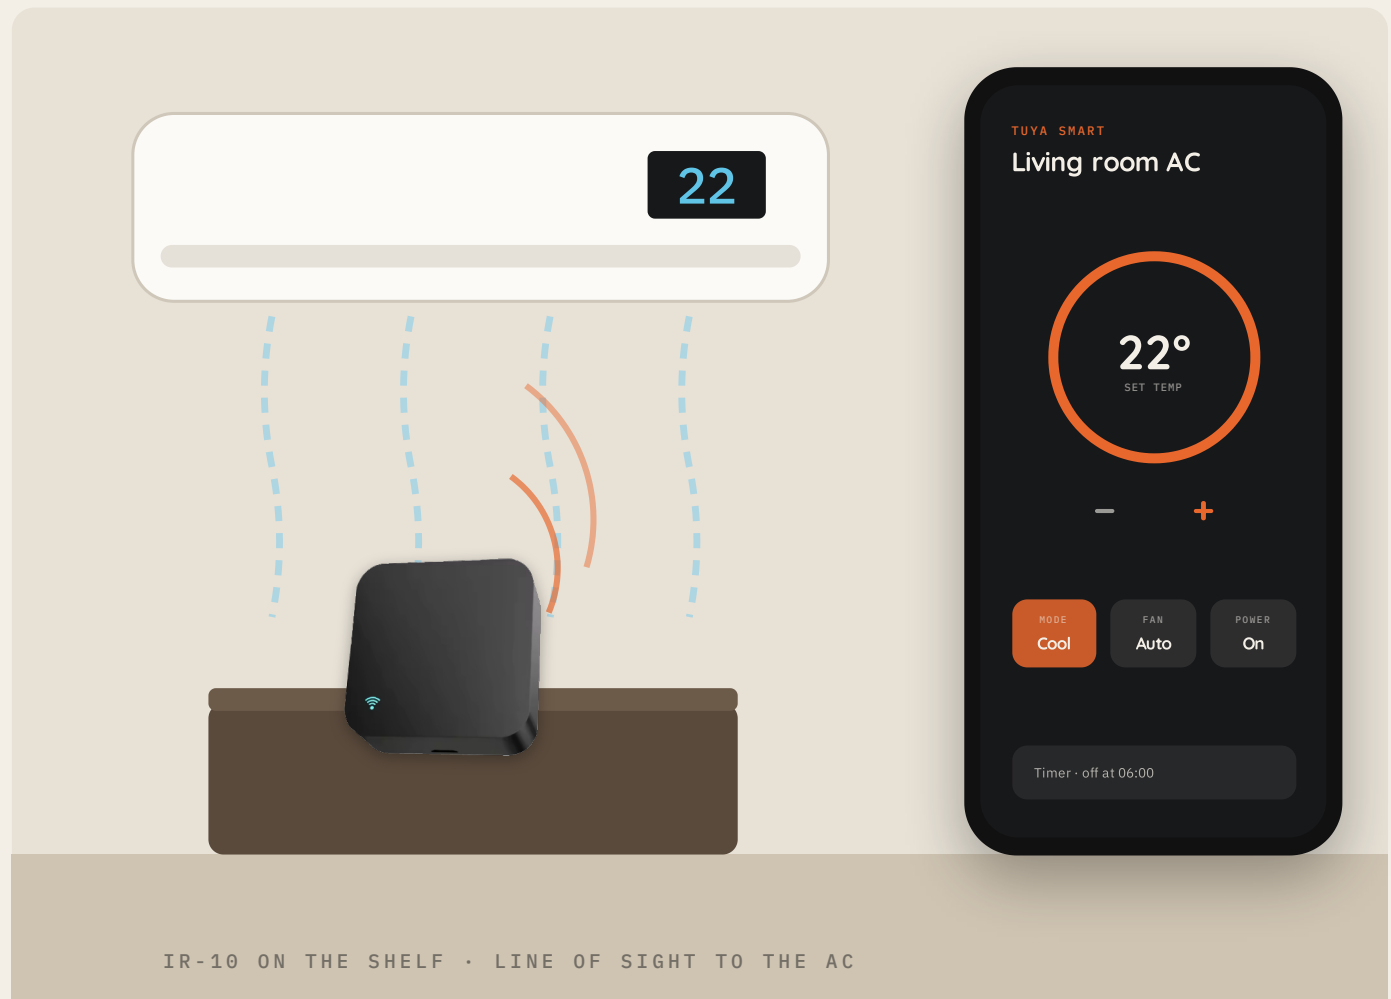

● Timers and modes

● Alexa · Google Home

● TV · fan · set-top box

SPLIT AC, IN THE APP

Cool the room before you get home.

From anywhere

On, off, temperature, mode and fan speed in the Tuya Smart app.

By voice

A simple command through Alexa or Google Home.

Any split AC

The IR code library covers above 98% of appliances.

IR learning

Not in the list? Copy the buttons of the original remote into the app.

Infrared needs a clear line of sight: place the IR-10 where it can see the AC. Range up to 10 m (32.8 ft) without barriers.

TIMERS AND MODES

A night that sets itself.

Preset the AC's mode, temperature and timing in the app. It supports multiple modes and timers, so the room stays comfortable while you sleep, without waking up cold.

Every mode

Multiple modes, such as cool and dry, as your AC offers them.

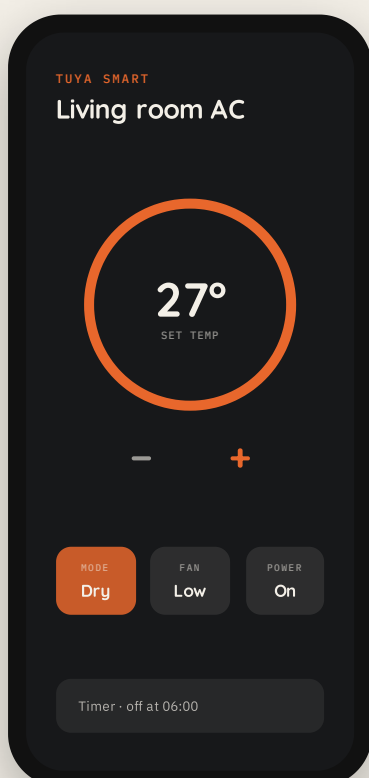

Timers

Change the temperature, the mode or switch off at a set time.

Set temperature

Step it up or down from the app, wherever you are.

IN THE TUYA SMART APP

Set it once. Sleep through it.

Timers change the temperature or the mode on their own, then switch the AC off before you wake.

IF THIS, THEN THAT

It reacts to your home.

Link the IR-10 with Tuya sensors in a scene. When something happens in the home, the IR-10 sends the right command to the AC, the TV or the fan.

If
Door opens
You arrive home

Then
Turn on the AC
IR-10 sends the IR code

If
Temperature is high
From a room sensor

Then
Turn on the AC
IR-10 sends the IR code

If
Someone is detected
From a motion sensor

Then
Turn on the fan
IR-10 sends the IR code

If
Door closes
You leave home

Then
Turn off the TV
IR-10 sends the IR code

Door, temperature and motion sensors are sold separately. Scenes are set up in the Tuya Smart app.

BEYOND THE AC

One box.
Every remote in the room.

IR CODE LIBRARY

98%+

The expanded IR code library covers above 98% of infrared appliances: TVs, air conditioners, set-top boxes, fans, lighting and more.

IR LEARNING

Not in the list?
Teach it.

Point the original remote at the IR-10 and press a button. The IR-10 copies it into a custom button in the Tuya Smart app.

TWO VERSIONS

Wi-Fi or Zigbee. Same IR power.

IR-10 Wi-Fi

Connects straight to the home Wi-Fi router. No hub needed.

IR-10 Zigbee

Joins through a Tuya Zigbee gateway, such as the one built into Spark 7-inch and 10-inch panels.

SPECIFICATIONS

Model	Spark IR-10	Voice	Alexa · Google Home
Type	Smart infrared remote	IR library	Above 98% of appliances
Network	Wi-Fi or Zigbee · 2 versions	IR learning	Yes, custom buttons
App	Tuya Smart · Smart Life	IR range	Up to 10 m (32.8 ft), no barriers

PART OF THE SPARK HOME

Put the AC in the same scenes as your Spark curtains, lights and locks.
