

SHOWN: SPARK MC-10 MOTOR, TRACK AND REMOTE CONTROL

WI-FI OR ZIGBEE · 433 MHZ REMOTE

● SPARK MC-10 · MOTORIZED CURTAIN SYSTEM

Curtains that open by themselves.

A quiet motor, a complete track and a remote control, in one kit. Open and close the curtains from the Tuya Smart app, by voice, by remote, on a timer, or with a gentle pull.

● Wi-Fi or Zigbee

● Tuya Smart app

● Alexa · Google Home

● 433 MHz remote

● Timer

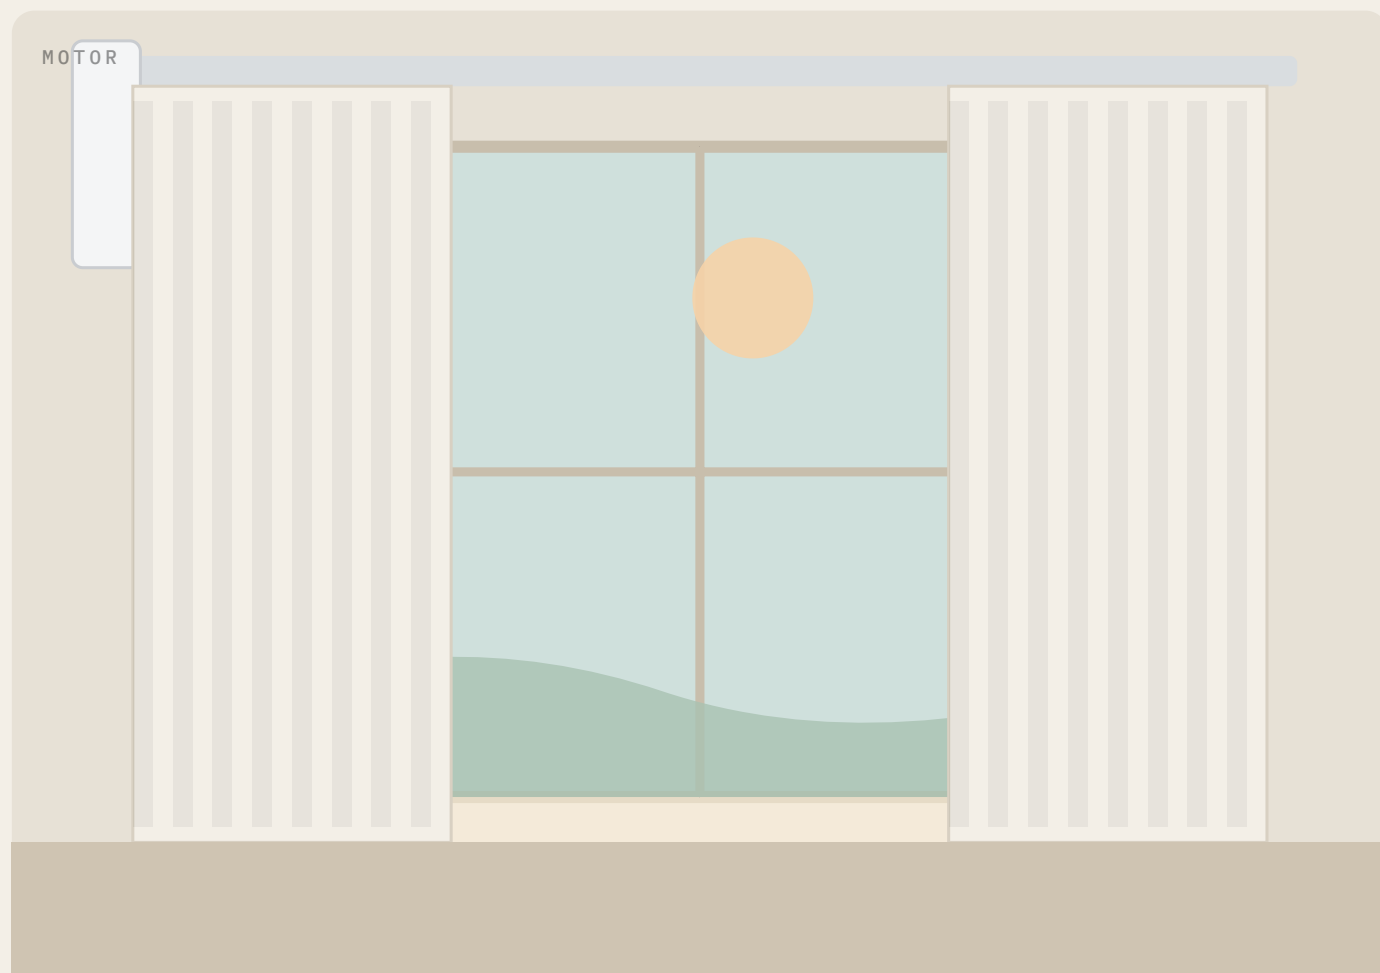

● Pull to start

● Silent motor

● Tracks 3.2 - 6.2 m

FIVE WAYS TO CONTROL

Open the day. Your way.

Tuya Smart app

Open, close or stop, and set a position, from anywhere.

Voice

Works with Alexa and Google Home.

433 MHz remote

Included in the kit. No need to find your phone.

Timer

Open at sunrise, close at night, every day.

Pull to start

Pull the curtain gently and the motor finishes the move.

Wired or wireless control. Several motors can also run together, so every curtain in the room moves at once.

QUIET AND SAFE

You hear the morning. Not the motor.

Silent system

Minimal vibration and noise, for bedrooms and living rooms.

Soft start, soft stop

The curtain speeds up and slows down smoothly.

Stops on resistance

If something is in the way, the motor stops by itself.

Overheat protection

Protects the motor from overheating.

Remembers its limits

The open and closed positions stay saved after a power cut.

Works without power

In a power cut, pull the curtains by hand.

Motors in sync

Several motors can work together.

Easy installation

Track, motor and runners come as one kit.

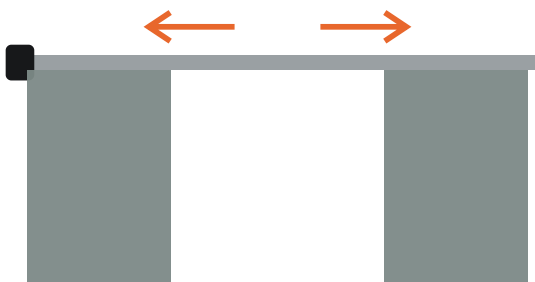

MOTOR • TRACK • RUNNERS

One complete track, ready to hang.

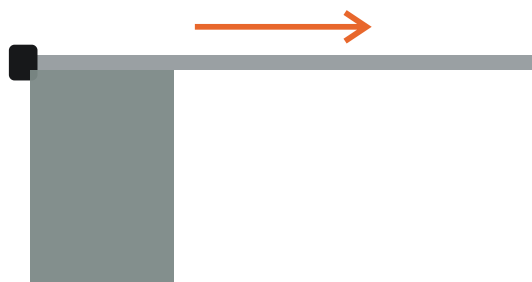

OPEN-CLOSE WAYS

One curtain or two. Centre or side.

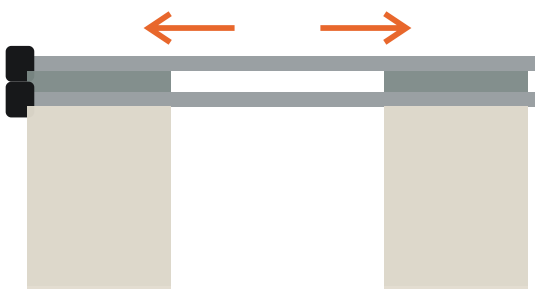

Single curtain

Opens from the centre to both sides

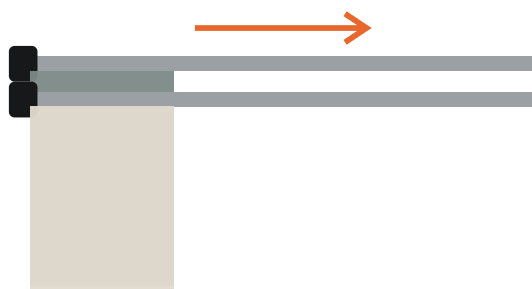

Single curtain

Opens to one side, left or right

Double curtain

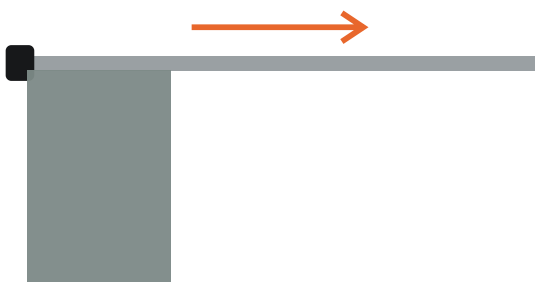

Two tracks, centre opening

Double curtain

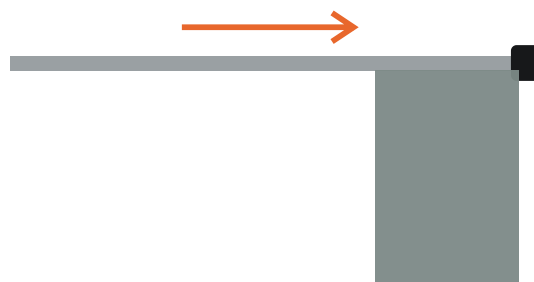

Two tracks, one-side opening

MOTOR ON EITHER SIDE

Motor on the left

Fits the room as it is.

Motor on the right

Choose the side with the power outlet.

WHAT IS IN THE KIT

Everything up there. In one box.

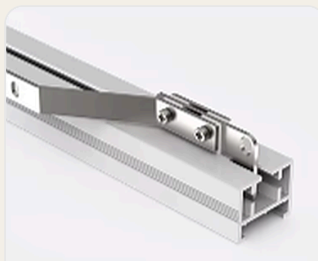

Motor

Smooth, quiet drive at the end of the track.

Curtain track

Aluminium track with the end bracket.

Tackle and track

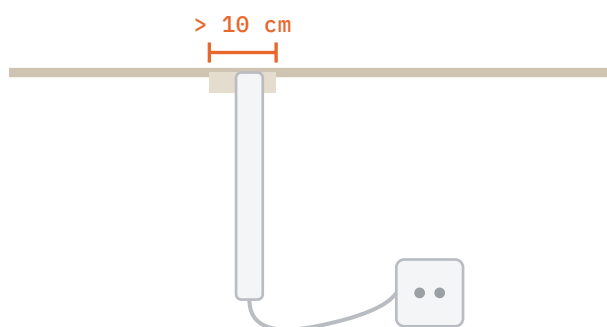

The master carriers that pull the curtain.

Runners and track

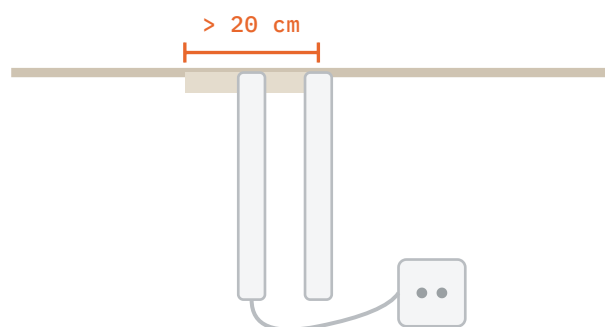

Hooks glide along the track.

BEFORE YOU INSTALL · CURTAIN BOX

Single track: more than 10 cm

Leave a curtain box deeper than 10 cm for one track.

Double track: more than 20 cm

Leave a curtain box deeper than 20 cm for two tracks.

Plan a power outlet near the motor. The motor's power cable is 1 m long, so the outlet should sit within reach of the motor end of the track.

SIZES

A track for every window.

3.2 m	Wi-Fi or Zigbee motor · track · runners · remote control · EU plug
4.2 m	Wi-Fi or Zigbee motor · track · runners · remote control · EU plug
5.2 m	Wi-Fi or Zigbee motor · track · runners · remote control · EU plug
6.2 m	Wi-Fi or Zigbee motor · track · runners · remote control · EU plug

Wi-Fi

Connects straight to the home router. No hub needed.

Zigbee

Joins through a Tuya Zigbee gateway, such as the one in Spark 7-inch and 10-inch panels.

SPECIFICATIONS

Model	Spark MC-10	Control	App · voice · remote · timer · wired
Network	Wi-Fi or Zigbee · 2 versions	Motion	Soft start, soft stop
